Concessions

PK	food_id	SERIAL
	drink_id	INTEGER
	full_name	VARCHAR
	quantity	INTEGER

There can be zero or many concessions sold when attending a movie

When people are going to the movies they are there for the movie and not only just for the concession

Movie

PK	movie_id	SERIAL
FK	movie_title	VARCHAR
	rating	INTEGER
	movie_duration	INTEGER
FK	customer_id	INTEGER
FK	ticket_num	INTEGER
FK	food_id	INTEGER

My reasoning is that Movie can have zero to many customers

Movie can have multiple tickets sold.

Customer

PK	customer_id	SERIAL
	full_name	VARCHAR
	phone_num	VARCHAR
	e_mail	VARCHAR
	movie_title	VARCHAR

My reasoning is that there could zero to many customers to see the movie

Ticket

PK	ticket_num	SERIAL
	movie_id	INTEGER
	movie_title	VARCHAR
	full_name	VARCHAR

Tickets can have zero to many tickets sold to the movie

Theater
